

GENDER EQUALITY INDEX

93/100

This is the value of the gender equality index at French Bee for the year 2020.

This index is calculated on the basis of four indicators:

- Pay gap between women and men
- Difference in the rate of individual increments (excluding promotion) between women and men
- Percentage of female employees returning from maternity leave during the reference year and receiving an increase on their return
- Number of employees of the under-represented sex among the ten employees with the highest salaries
